

**JUNE**

**2017**

# Education Newsletter

## School's Out!

Summer is here and that means programming is in full swing at the Armstrong Air & Space Museum. Continue education throughout the summer by taking an outing to the museum, participating in a special event, or visiting us at your local library.

## Astronaut Camp

Registration for Astronaut Camp has now opened. Camp for students entering 2nd-5th grade will be June 12-16. Those entering 5th-8th grade will attend camp from August 7-11. Campers will build and launch model rockets, learn about flight, conquer engineering challenges, and much more. Registration forms can be picked up at the museum or found online at <https://www.armstrongmuseum.org/camps>. Please return or mail forms to the museum. Spots are limited and filled on a first come, first served basis.

## See us at Your Local Library!

The Armstrong Air & Space Museum will be visiting libraries all across Ohio throughout the summer bringing our programming to your hometowns. This summer, our programs align with your library's Summer Reading Program theme of "Building a Better World". Contact your local library to see if the Armstrong Air & Space Museum will be coming and to find out when. Then, be sure to attend to learn how you can build a better world and receive a museum bookmark that serves as one free child's admission.

### MUSEUM HOURS

Monday - Saturday 9:30am-5pm  
Sunday 12pm-5pm

### INFORMATION & CONTACT

### VOLUNTEER OPPORTUNITIES

Volunteering is a great way to engage with the community and share your enthusiasm for aerospace, education, and local history. The Armstrong Air & Space museum is seeking friendly, energetic, reliable individuals ages 13 and up. We rely on the dedication of our volunteers for the success of the museum. Potential positions include tour guide, event planning, education, customer service, and groundskeeping. Any necessary training will be provided. Those interested in becoming a volunteer with the museum should contact Christopher Moynihan, Director of Programming and Education at [programs@armstrongmuseum.org](mailto:programs@armstrongmuseum.org)

## Summer Moon Festival

Returning again for 2017, is our annual Summer Moon Festival, set to coincide with the 48th anniversary of the Apollo 11 lunar landing. On July 22nd and 23rd, the grounds of the Armstrong Air & Space Museum will host educational activities, crafts, face painting, giant inflatable obstacles and other rides, mini golf, a variety of special guests including astronaut Buzz Aldrin, and much more! Take a break from the summer heat by touring through the museum before heading back outside to enjoy more activities. Stay tuned to future newsletters and check out our website for more information, which will continually be updated. The town of Wapakoneta will host it's own festivities throughout the weekend. Mark your calendars to spend a space-filled weekend in Wapakoneta! We look forward to seeing you there!
